# RO Filtration System With Pitcher

# RO Filtration System With Pitcher

# Specification

| Model | N2-RO-50,75,100,150,200 | |
|---|---|---|
| Feature | 1st filter | PP+CB |
| | 2nd filter | RO |
| Specification | Capacity | 4000L |
| | Power | 48W |
| | Voltage | Input : AC110~220V 50~60Hz |
| | Operating pressure | Output : DC24V |
| | Inlet water pressure | 0.4-0.9Mpa |
| | | 0.1-0.4MPa |
| | Water Temp | 5℃-38℃ |
| | Product size | 370*120*140mm(RO machine)<br>2.4L (Pitcher volume)<br>2.1L (Maximum water level) |

## Water tube and power connect

# Product UI View

◆ Shut down the inlet water supply and take out the pitcher from pitcher base.

* If the customer don’t do this step , there will be a little water rush out during changing the filter because of the water pressure.

◆ Push the cartridge to button and release , the cartridge will be ejected by itself automatically.

◆ Replace the cartridge in the machine and push to bottom.
